

# The ultimate computer monitor for creative professionals

## Excellent upsell and add-on opportunity for digital content creation

Introducing the Cintiq family of large-format, interactive pen displays. Both high-quality LCD displays allow creative professionals such as photographers, designers, and artists to work with a pen directly on the monitor. Working naturally and intuitively on screen can speed any digital workflow and encourage creativity.

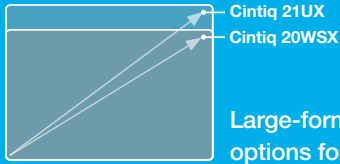

The pressure sensitive pen simulates working with traditional tools such as brushes and markers but with all the speed and productivity benefits of a digital workflow.

All products in the Cintiq line work with any software application on Mac and PC notebooks or workstations. Additionally, many software applications from industry leaders such as Adobe®, Autodesk®, Corel® and Nik® have special features that are designed to work only with the pressure-sensitive pen. All graphics quality Cintiq displays can be color-calibrated to work with the most color demanding workflows such as digital imaging and printing.

**PEN-ON-SCREEN**

- Allows users to work comfortably and naturally directly onscreen
- Provides intuitive pen control in all applications and across multiple monitors
- Speeds workflow by taking advantage of natural hand-eye coordination

**PRESSURE SENSITIVE PEN**

- Unlocks pressure-sensitive controls in leading software applications from Adobe®, Corel® and Autodesk®
- Provides superior control for retouching images and creating effects

**PRODUCTIVITY TOOLS**

- Allows users to program ExpressKeys™ for frequently-used hot keys and favorite pop-ups to speed workflow
- Allows users to program Touch Strips to control dynamic functions like zooming and scrolling
- Allows users to customize settings and pop-up menus to be application-specific for maximum productivity
- Simplifies cursor control in a multi-display environment with Display Toggle function

**HIGH-QUALITY DISPLAY**

- Allows users to color calibrate to workflow needs and to other monitors in color-critical environments
- Provides high pixel count for detailed work
- Includes durable, scratch-resistant surface with anti-glare coating

**COMPATIBILITY**

- Connects to any laptop or desktop computer
- Requires Windows 2000, XP, Vista or Mac OS X 10.2.6 or later

**VALUE**

- Time savings result in lower labor costs
- Combines a graphics quality monitor with a large format graphics tablet
